

Module 1: Desktop Readiness

- Welcome to the Cayuse424 **Desktop Readiness** Module.
- In this module you will learn:
 - What is required to prepare your desktop so that you can access and use the Cayuse424 web application to support proposal development and electronic submission to Grants.gov
 - Browser selection and settings
 - Where to obtain detailed instructions on getting your desktop ready

Browser Critiques

When selecting and configuring a browser, keep the following features in mind:

- **Firefox** - Recommended browser for Cayuse424 with any operating system. Firefox has the fastest load & response times. We currently support 2.0.

- **Internet Explorer** - Slower than Firefox but an effective browser for the application. We support up to IE7.

- **Safari** – Not supported at this time due to significant browser bugs. We are keeping watch on this Mac platform browser and anticipate better performance with the release of Leopard.

Browser Configuration Instructions

- Allow cookies and pop-ups for Cayuse424; enable JavaScript
- For detailed instructions on how to configure your web browser see:
 - <http://rf.osu.edu/cayuse424/documents/BrowserConfiguration.pdf>
